JOACHIM WATERSCHOOT

I am a PhD student in Developmental and Motivational Psychology at Ghent University in Belgium, the faculty of Psychology and Educational Sciences at the department of Developmental, Personality and Social Psychology. My research interests are statistics and motivation psychology, with the focus on the proactive capacity of self-motivation: 'How do people motivate themselves?'.

I graduated in (Experimental) Psychology and Statistical Data Analysis. Thereby, I like to read and write about statistics, especially in the software R. Additionally, I wrote a website CaviR statistics and several online applications and tutorials to help people in their analyses and to make statistics more applicable.

In my spare time, I attempt to compose music and do photography.
